

ADMISSIONS PROCEDURE

Procedure for Undergraduate Admissions

Students must apply to TU using the Common Application and complete the application requirements based on their student type:

- Freshmen Application Process
- Transfer Application Process

Application fees and enrollment deposits are non-refundable. Freshman applicants are responsible for submitting their official high school transcripts, including final grades with verification of graduation, as they become available. Transfer applicants must submit all official college transcripts from every institution attended, whether or not credit was earned.

TU is test-optional: SAT and/or ACT scores are not required for admission but are considered if submitted. To be considered official, scores must be sent directly by the testing agency. TU's College Board identification code number is 5404 and our ACT code is 1718. The Writing section is not required for either test.

Applications that remain incomplete will be canceled, with students notified prior to this action taking place. The applications of admitted students who do not enroll for the given application term will be canceled, and a new application will be required to be considered for any future terms.

All entering students including freshman, graduate and transfer students are required to submit proof of immunizations. The list of immunization requirements and the submission portal can be found on the Health Center website.
