Programs of the Department

The Department of Learning Technologies, Design and School Library Media is committed to offering courses that emphasize creativity, problem-solving, critical thinking, and innovation by providing hands-on, project-based, problem-based, and experiential learning opportunities where students work on projects related to local education, government, health care, nonprofit, and industry to solve real-world problems. The department offers a doctoral program, master's programs and variety of post-baccalaureate certificates.

See the Graduate Catalog for details.
