Program Director: Dr. Connie Anderson
Phone: 410-704-4640
Email: connieanderson@towson.edu

The Post-Baccalaureate Certificate (PBC) Program in Autism Studies is designed to enhance the knowledge and subsequent practice of professionals working with individuals on the autism spectrum and their families across the lifespan. It is grounded in the belief that people on the autism spectrum are integral members of their families and communities, and have the right to fully participate in the educational, social, cultural, political and economic life of society.

Topics covered include typical traits of individuals on the spectrum, their gifts and challenges, co-occurring conditions, epidemiology, evidence-based interventions, classroom and workplace strategies, family impact, and research and key policy issues. Earning this degree validates your commitment to working in the field and prepares you to broaden your role as an educator, early childhood professional, mental health professional, occupational therapist, speech-language pathologist, agency staff, disability specialist, researcher, advocate or policymaker.

The 16-unit program — including five 3-unit courses and one 1-unit course — generally takes 1-2 years to complete. Many courses are offered in the evening "live" online (using a virtual classroom system called WebEx) to accommodate working professionals.

In some cases, it is possible to combine this PBC with a Master's or doctoral degree program to enhance your professional credentials. This option may be of particular interest to students in advanced degree programs such as Occupational Therapy, Child Life, Health Science and Early Childhood Education.

Admission Requirements

- A bachelor's degree from a regionally accredited college or university.**
- An undergraduate GPA minimum of 3.00 (2.75 for conditional admission) in either the cumulative units of the degree or the last 60 units of the degree. An admission exception policy is in place for eligible candidates with undergraduate degrees obtained at least 5 years ago.
- Completion of the following courses with a grade of "C" or better:
  - Human development across the life span (one lower-division course)
  - Human Biological Science (one lower-division course)
  - Social or Behavioral Science (one lower-division course)
  - Documentation of completion of 30 hours of human service activity as part of field experience, volunteer or paid work in the last five years (e.g., experience with a human service agency or community program, educational or health program, advocacy group, Special Olympics)

For those whose primary employment involves "human service" (e.g., educators, therapists), a resume may serve as evidence of completion of the required service hours.

Students may request a competency in lieu of course work review by the Post-Baccalaureate Certificate Program Committee for the required courses for admission. Students must submit documentation of didactic preparation (e.g., workshops, professional development or related courses) and professional practice that verifies course content mastery.

Non-immigrant International Students

Program Enrollment: F-1 and J-1 students are required to be enrolled full-time. The majority of their classes must be in-person and on campus. See the list of programs that satisfy these requirements (https://www.towson.edu/academic/admissions/international/programs-complying-j1-f1-regulations.html), and contact the International Student and Scholars Office (https://www.towson.edu/academic/international/isso) with questions.

Admission Procedures: See additional information regarding Graduate Admission policies (https://www.towson.edu/academic/admissions/policies.html) and International Graduate Application (https://www.towson.edu/academic/graduate/admissions/international) online.

**See Exceptions to Policy in Graduate Admissions (https://www.towson.edu/academic/graduate/admissions/policies.html).

Certificate Requirements

The Post-Baccalaureate Certificate Program in Autism Studies consists of a total of 16 units: 10 units of required courses and 6 units of electives.

Total Units 16

1 Courses may be taken as part of required or elective courses in student's graduate program.
Courses must have prior written consent and approval from the director of the autism certificate program for learning activities to satisfy requirements of the autism certificate.

Courses may be taken in lieu of required electives.

1. Students will demonstrate acquisition of knowledge related to the field of autism that addresses epidemiology, etiology, and diagnosis as well as strengths and challenges of individuals with autism, issues faced by their families, and the roles and effectiveness of relevant systems (e.g. public schools, adult service agencies).

2. Students will critically evaluate autism research to identify evidence-based interventions, policies, and practices that contribute to optimal outcomes and enhance quality of life for people on the autism spectrum and their families.

3. Students will effectively communicate autism information, sensitive to whether their audience consists of professionals or laypeople, using technology as appropriate.
