Why Study Management?
The rapid and continuous changes taking place in our global economy require skilled managers and leaders to ensure not only effective performance but also survival. Organizations of all sizes in all sectors of our economy face unprecedented challenges that require informed, strategic decision-making and principled leadership.

The programs of study in management are designed to allow students to develop the critical marketable skills that employers seek. Courses and programs of study within the department emphasize the development of global awareness, ethical decision-making, technological competency and ongoing personal and professional development. Ongoing curricula development ensures that course offerings and content reflect the current practices used and challenges faced by organizations. Because management is a broad field of study, the concentrations/tracks in Entrepreneurship, Human Resource Management, International Business and Management offer students a flexible course of study that can be individualized to meet their specific career objectives.

Regardless of concentration area, all students will find several recurring themes in their course work:

• the impact of technology on management practices
• an awareness and understanding of the global environment in which organizations operate and managers make decisions
• legal and ethical dilemmas faced by managers in carrying out their responsibilities
