

MAJOR IN GERONTOLOGY

Towson University offers an undergraduate degree program leading either to the Bachelor of Arts or Bachelor of Science degree in Gerontology. The course work is multidisciplinary and provides students with an understanding of the scope of gerontology, the issues that are central to the study of aging, and a perspective from which students may understand the phenomenon of human aging and its implications for families and society. The program is designed to prepare students for entry-level professional positions in the field of aging, social services, and aging policy, as well as provide the knowledge and skills necessary for graduate and professional schools.

Honorary Society

Sigma Phi Omega, the national honor society in gerontology, has established the Delta Rho Chapter at Towson University. The purpose of the society is to recognize excellence in the academic standing of students studying or majoring in gerontology and to provide enriched opportunities and service activities for members. The faculty adviser is Allison Kabel, 410-704-5892 / akabel@towson.edu.
