The Allied Health program is designed to give practicing health care professionals the opportunity to advance their careers by expanding their skills in the health care marketplace. Students enter the program with a completed associate’s degree from a regionally accredited institution in an allied health field. The program builds on students’ existing associate’s degrees and clinical backgrounds and prepares them to assume additional responsibilities through advanced learning in health care administration and management, organization and funding, ethical and professional issues, and research findings that affect best practice. Graduates are better positioned for promotions, movement into related positions or job expansion.

The Bachelor of Technical or Professional Studies (B.T.P.S.) in Allied Health is a recognized bachelor’s degree program designed to facilitate maximum transfer of academic credit for associate’s degree graduates from a variety of health and health-related programs. Frequently, graduates from associate’s degree allied health programs entering baccalaureate degree programs are not able to transfer health discipline specific courses to the baccalaureate program. This is not the case with the Allied Health program since most or all of the health discipline specific courses, up to 64 transfer credits, transfer to the bachelor’s degree program. Students may also be able to transfer in other applicable course work that has been taken at other four-year institutions, for a combined total of 90 transfer credits.

Associate’s degree graduates of the disciplines listed below are eligible for enrollment in the Allied Health program. Graduates of associate’s degree health programs receive a number of different degrees—A.A.S., A.S., A.A., etc.—all of which are eligible for participation in the program.

- Cardiovascular technologist
- Clinical laboratory technician
- Dental hygienist
- Diagnostic medical technologist
- Dietetic technician
- Emergency medical technician – paramedic
- Health information technician
- Massage therapist
- Medical assistant
- Nuclear medicine technologist
- Nurse
- Occupational therapy assistant

Other Associate of Arts degrees may be eligible; contact program director.

**Program Objectives**

The Allied Health degree program is designed to prepare students to:

- assume managerial, supervisory and/or clinical education roles within their respective areas of health practice
- enhance their use of ethically grounded and culturally sensitive practices in their administration and delivery of health services
- effectively use technology and scientific inquiry to support and guide their roles as health practitioners and administrators
- understand, evaluate and influence societal, economic and political forces that impact health practices at the individual, regional and national levels
- communicate effectively with clients, colleagues, agencies and the community in their roles as health practitioners and administrators

**Financial Aid**

While the Allied Health Program has no scholarships specifically designated for the program, students in the program are eligible for a number of merit and need-based financial aid awards through Towson University. For information on available aid, please contact the Towson University Financial Aid Office at (410) 704-4236, or visit the office’s website at www.towson.edu/finaid.

**For More Information**

For further information concerning the Allied Health Program, including specifics on how course work completed at community colleges will apply toward the program, contact Professor Tamara Burton in the Department of Interprofessional Health Studies at Towson University by phone, 410-704-4049.

**Admission Requirements**

Program applicants must have an earned associate’s degree in an allied health discipline and a minimum 2.00 GPA upon transfer. If you hold an associate’s degree in a health discipline that is not listed above, please contact the Allied Health program coordinator for further information. You may be eligible for admission.

One route to earn an associate’s degree to meet the requirement for admission into the Allied Health Program is through a dual enrollment option whereby students are simultaneously enrolled at the Community College of Baltimore County (CCBC) to earn an Applied Associate of Science Degree (A.A.S.) in Respiratory Care Therapy while taking classes at Towson University. Eligibility to complete the Allied Health Degree and earn the B.T.P.S. in Allied Health is contingent upon the completion of the Respiratory Therapy A.A.S. degree. See the Advanced Respiratory Track for more information about this option.

**Major in Allied Health with tracks in:**
Major in Allied Health
