CLIMATE, WEATHER & SOCIETY MINOR

Students minoring in Climate, Weather & Society will be provided with an introduction to atmospheric principles and meteorological phenomena such as heat waves, drought, hurricanes and severe thunderstorms. The minor is suitable for students who wish to be informed about this field and who might pursue careers in environmental policy, emergency management, mass communication, government, and industry, or graduate work in environmental or physical geography.

The minor is awarded upon completion of a minimum of 21 units of required and elective courses. The Department of Geography and Environmental Planning will accept up to 6 units of electives from other departments. Note that some of the electives may have prerequisites associated with them.
